

CHLOE GILL

INTERIOR DESIGNER

I am a passionate and committed junior Interior Designer, who has recently completed a double degree with a Bachelor of Business and a Bachelor of Interior Design (with a specialisation in Commercial Interiors). I decided to combine my love of design and business into my studies, to enhance my practical processes in both vastly growing industries.

I am eager to build on my existing skill sets, and increase my understanding of Innovative, functional and beautiful spaces. I have recently completed an internship with Hunt and Design, improving my overall attention to detail, building my confidence and skills in 3D modelling and construction documentation. As part of my course, I studied at Naba in Milan, Italy for five months. This was a fantastic experience working collaboratively with other creatives, that exposed me to interior design through the lens of a different cultures.
